

## TW 5560 Flat Iron Oxide Yellow Water-Based Poster Ink

### Sales Sheet & Technical Specifications

TW 5560 Flat Iron Oxide Yellow is part of the TW 5500 Series, a professional-grade, one-component water-based screen printing ink engineered for poster printers and flat-stock applications. Designed for concert posters, event graphics, fine art prints, and rigid substrates, this ink delivers rich color, a smooth flat finish, and reliable adhesion.

#### **Key Selling Points**

- Flat matte finish ideal for posters and fine art printing
- Excellent adhesion on paper and rigid substrates
- Water-based system with easy cleanup
- Up to 3 years light-fastness (indoor / controlled use)
- Automotive-grade pigments for consistent color
